Volume 190 1990

Table of contents

No. 1 1–232 issued on May 31, 1990
No. 2 233–444 issued on June 20, 1990
No. 3 445–712 issued on July 5, 1990

Information for Authors 631–636

Author and Keyword Index 637–712

Reviews

Molecular analysis of a cellular decision during embryonic development of *Drosophila melanogaster*: epidermogenesis or neurogenesis
J. A. Campos-Ortega and E. Knust 1– 10

Form determination of the heads of bacteriophages
E. Kellenberger 233–248

Insulin-like growth factors I and II
R. E. Humbel 445–462

Nucleic acids, protein synthesis and molecular genetics

Organization and complete nucleotide sequence of the core-histone-gene cluster of the annelid *Platynereis dumerilii*
D. Sellos, S. A. Krawetz and G. H. Dixon 21– 29

Human and murine urokinase cDNAs linked to the murine αA-crystallin promoter exhibit lens and non-lens expression in transgenic mice
R. Miskin, J. H. Axelrod, A. E. Griep, E. Lee, D. Belin, J.-D. Vassalli and H. Westphal 31– 38

GAB1, the general amino acid permease gene of *Saccharomyces cerevisiae* — Nucleotide sequence, protein similarity with the other bakers yeast amino permeases, and nitrogen catabolite repression
J.-C. Jauniaux and M. Grenson 39– 44

The E2 protein of human papillomavirus type 16 — Over-expression and purification of an active transcriptional regulator
E. M. Lees, H. P. C. Driessen, L. V. Crawford and A. R. Clarke 85– 92

Analysis of hepatic copper, zinc, metallothionein and metallothionein-Ia mRNA in developing sheep
J. A. Paynter, J. Camakaris and J. F. B. Mercer 149–154

Nucleotide sequence and exon-intron organization of the human proacrosin gene
S. Keime, I. M. Adham and W. Engel 195–200

Renaturation of protein phosphatase 1 expressed at high levels in insect cells using a baculovirus vector
N. Berndt and P. T. W. Cohen 291–297

Isolation and sequence of the canine pancreatic phospholipase A_2 gene
B. Kerfelec, K. S. LaForge, P. Vasiloudes, A. Puigserver and G. A. Scheele 299–304

Binding of nuclear proteins to the enhancer elements of the rat apolipoprotein A-I gene
P. Dai, S. S.-F. Lan, X. Ding and Y. Chao 305–310

Identification and characterisation of a *Leishmania donovani* antigen belonging to the 70-kDa heat-shock protein family
J. MacFarlane, M. L. Blaxter, R. P. Bishop, M. A. Miles and J. M. Kelly 377–384

Molecular characterization of three rat liver serine-protease inhibitors affected by inflammation and hypophysectomy — Protein and mRNA analysis and cDNA cloning
G. Pages, J. F. Rouayrenc, G. Le Cam, M. Mariller and A. Le Cam 385–391

Analysis of the promotors of the single-copy genes for plastocyanin and subunit δ of the chloroplast ATP synthase from spinach
J. Bichler and R. G. Herrmann 415–426

Effects of nutrients and hormones on transcriptional and post-transcriptional regulation of fatty acid synthase in rat liver
A. Katsurada, N. Iritani, H. Fukuda, Y. Matsumura, N. Nishimoto, T. Noguchi and T. Tanaka 427–433

Effects of nutrients and hormones on transcriptional and post-transcriptional regulation of acetyl-CoA carboxylase in rat liver
A. Katsurada, N. Iritani, H. Fukuda, Y. Matsumura, N. Nishimoto, T. Noguchi and T. Tanaka 435–441

Potent inhibitory effects of the 5'-triphosphates of (*E*)-5-(2-bromovinyl)-2'-deoxyuridine and (*E*)-5-(2-bromovinyl)-1-β-D-arabinofuranosyluracil on DNA polymerase γ
K. Ono, H. Nakane and E. de Clercq 463–467

Differential inhibitory effects of various flavonoids on the activities of reverse transcriptase and cellular DNA and RNA polymerases
K. Ono, H. Nakane, M. Fukushima, J.-C. Chermann and F. Barré-Sinoussi 469–476

Characterization of the human cyclophilin gene and of related processed pseudogenes
B. Haendler and E. Hofer 477–482

Implications for a reduced DNA-elongation rate in polyamine-depleted cells
S. M. Oredsson, B. Nicander and O. Heby 483–489

Structure of the human gene for α-enolase
A. Giallongo, D. Oliva, L. Cali, G. Barba, G. Barbieri and S. Feo 567–573

Protein chemistry and structure

Monoclonal antibodies against different epitopes of peptide hormones — Use of photoreactive analogues in studies on vasopressin
M. Jurzak, R. Boer, G. Fritzsch, E. Kojro and F. Fahrenholz 45– 52

Fluorescence spectroscopic analysis of ligand binding to kringle 1 + 2 + 3 and kringle 1 fragments from human plasminogen
Y. V. Matsuka, V. V. Novokhatny and S. A. Kudinov 93–97

Purification and characterization of lipopolysaccharide-binding protein from hemolymph of American cockroach *Periplaneta americana*
T. Jomori, T. Kubo and S. Natori 201–206

Three human interferon-α2 subvariants disclose structural and functional differences
A. von Gabain, E. Lundgren, M. Ohlsson, E. Holmgren, S. Josephsson and S. S. Alkan 257–261

Proton NMR studies of apo-neocarzinostatin from *Streptomyces carzinostaticus* – Sequence-specific assignment and secondary structure
E. Adjadj, J. Mispelter, E. Quiniou, J.-L. Dimicoli, V. Favaudon and J.-M. Lhoste 263–271

Protein-decorated micelle structure of sodium-dodecyl-sulfate–protein complexes as determined by neutron scattering
K. Ibel, R. P. May, K. Kirschner, H. Szadkowski, E. Mascher and P. Lundahl 311–318

Complete amino acid sequence of tenebrosin-C, a cardiac stimulatory and haemolytic protein from the sea anemone *Actinia tenebrosa*
R. J. Simpson, G. E. Reid, R. L. Moritz, C. Morton and R. S. Norton 319–328

Structure of human myeloma IgG3 Kuc
S. Ryazantsev, V. Tishchenko, V. Vasiliev, V. Zav'yalov and V. Abramov 393–399

Cloning and sequencing of a Porifera partial cDNA coding for a short-chain collagen
J.-Y. Exposito, R. Ouazana and R. Garrone 401–406

Preliminary crystallographic data for protease Ω
R. W. Pickersgill, I. G. Sumner and P. W. Goodenough 443–444

The role of copper in the stability of ascorbate oxidase towards denaturing agents
I. Savini, S. D'Alessio, A. Giartosio, L. Morpurgo and L. Avigliano 491–495

Thermodynamic parameters for binding of fatty acids to human serum albumin
A. O. Pedersen, B. Honoré and R. Brodersen 497–502

The two coiled coils in the isolated rod domain of the intermediate filament protein desmin are staggered – A hydrodynamic analysis of tetramers and dimers
M. Potschka, R. Nave, K. Weber and N. Geisler 503–508

Sites phosphorylated in bovine cardiac troponin T and I – Characterization by ^{31}P-NMR spectroscopy and phosphorylation by protein kinases
K. Swiderek, K. Jaquet, H. E. Meyer, C. Schächtele, F. Hofmann and L. M. G. Heilmeyer Jr 575–582

Computer-aided assignment of the ^{1}H-NMR spectrum of the viral-protein-genome-linked polypeptide from cowpea mosaic virus
F. J. M. van de Ven, P.-O. Lycksell, A. van Kammen and C. W. Hilbers 583–591

Enzymology

Vanadate inhibits liver fructose-2,6-bisphosphatase
M. H. Rider, R. Bartrons and L. Hue 53–56

Palmitoyl-CoA and the acyl-CoA thioester of the carcinogenic peroxisome-proliferator ciprofibrate potentiate diacylglycerol-activated protein kinase C by decreasing the phosphatidylserine requirement of the enzyme
A. Orellana, P. C. Hidalgo, M. N. Morales, D. Mezzano and M. Bronfman 57–61

Isolation and characterization of UDP-glucose dolichyl-phosphate glucosyltransferase from human liver
H. Matern, R. Bolz and S. Matern 99–105

A novel peroxisomal nonspecific lipid-transfer protein from *Candida tropicalis* – Gene structure, purification and possible role in β-oxidation
H. Tan, K. Okazaki, I. Kubota, T. Kamiryo and H. Utiyama 107–112

Kinetic theory of enzymatic reactions in reversed micellar systems – Application of the pseudophase approach for partitioning substrates
Y. L. Khmelnitsky, I. N. Neverova, V. I. Polyakov, V. Y. Grinberg, A. V. Levashov and K. Martinek 155–159

An NMR study of anion binding to yeast phosphoglycerate kinase
W. J. Fairbrother, H. C. Graham and R. J. P. Williams 161–169

Purification of soluble guanylyl cyclase from bovine lung by a new immunoaffinity chromatographic method
P. Humbert, F. Niroomand, G. Fischer, B. Mayer, D. Koesling, K.-D. Hinsch, H. Gausepohl, R. Frank, G. Schultz and E. Böhme 273–278

Purification and characterization of hydroxypyruvate reductase from a serine-producing methylotroph, *Hyphomicrobium methylovorum* GM2
Y. Izumi, T. Yoshida, H. Kanzaki, S. Toki, S. S. Miyazaki and H. Yamada 279–284

Purification and characterization of serine–glyoxylate aminotransferase from a serine-producing methylotroph, *Hyphomicrobium methylovorum* GM2
Y. Izumi, T. Yoshida and H. Yamada 285–290

Inhibition of L-lactate:cytochrome-*c* reductase (flavocytochrome b_2) by product binding to the semiquinone transient – Loss of reactivity towards monoelectronic acceptors
M. Tegoni, J.-M. Janot and F. Labeyrie 329–342

Characterization of purified pp60$^{c\text{-}src}$ protein tyrosine kinase from human platelets
C. Reuter, D. Findik and P. Presek 343–350

Fine tuning of the catalytic properties of carbonic anhydrase – Studies of a Thr200 → His variant of human isoenzyme II
G. Behravan, B.-H. Jonsson and S. Lindskog 351–357

The roles of ATP^{4-} and Mg^{2+} in control steps of phosphoglycerate kinase
W. J. Fairbrother, H. C. Graham and R. J. P. Williams 407–414

Prolyl aminopeptidase from rat brain and kidney — Action on peptides and identification as leucyl aminopeptidase
A. Turzynski and R. Mentlein 509–515

Purification and characterization of a DNA polymerase from the archaebacterium *Thermoplasma acidophilum*
A. Hamal, P. Forterre and C. Elie 517–521

Isolation and characterization of a phosphatidylinositol-glycan-anchor-specific phospholipase D from bovine brain
M. C. Hoener, S. Stieger and U. Brodbeck 593–601

The control of lipase-catalysed transesterification and esterification reaction rates — Effects of substrate polarity, water activity and water molecules on enzyme activity
M. Goldberg, D. Thomas and M.-D. Legoy 603–609

Carbohydrates, lipids and other natural products

Conformational studies on the N-linked carbohydrate chain of bromelain
J. B. Bouwstra, E. C. Spoelstra, P. De Waard, B. R. Leeflang, J. P. Kamerling and J. F. G. Vliegenthart 113–122

Architecture of bacterial lipid A in solution — A neutron small-angle scattering study
H. Labischinski, E. Vorgel, W. Uebach, R. P. May and H. Bradaczek 359–363

Physical and inorganic biochemistry

Electron transfer reactions of metalloproteins at peptide-modified gold electrodes
P. D. Barker, K. Di Gleria, H. A. O. Hill and V. J. Lowe 171–175

Thermodynamic nonideality in macromolecular solutions — Evaluation of parameters for the prediction of covolume effects
K. E. Shearwin and D. J. Winzor 523–529

A ^{31}P-nuclear-magnetic-resonance study of NADPH—cytochrome-*P*-450 reductase and of the *Azotobacter* flavodoxin/ferredoxin-$NADP^+$ reductase complex
P. J. M. Bonants, F. Müller, J. Vervoort and D. E. Edmondson 531–537

The initial characterization of the iron environment in lipoxygenase by Mössbauer spectroscopy
W. R. Dunham, R. T. Carroll, J. F. Thompson, R. H. Sands and M. O. Funk Jr 611–617

Membranes and bioenergetics

Phospholipid specificity of bovine heart bc_1 complex
H. Schägger, T. Hagen, B. Roth, U. Brandt, T. A. Link and G. von Jagow 123–130

A critical evaluation of the hydropathy profiles of membrane proteins
M. Degli Esposti, M. Crimi and G. Venturoli 207–220

pH-Induced insertion of the amphiphilic α-helical anchor of *Escherichia coli* penicillin-binding protein 5
D. A. Phoenix and J. M. Pratt 365–369

Bile acids mobilise internal Ca^{2+} independently of external Ca^{2+} in rat hepatocytes
L. Combettes, B. Berthon, E. Doucet, S. Erlinger and M. Claret 619–623

Metabolism and metabolic regulation

Metabolism and actions of 2-deoxy-2-fluoro-D-galactose *in vivo*
B. R. Grün, U. Berger, F. Oberdorfer, W. E. Hull, H. Ostertag, E. Friedrich, J. Lehmann and D. Keppler 11–19

Phalloidin-induced accumulation of myosin in rat hepatocytes is caused by suppression of autolysosome formation
T. Ueno, S. Watanabe, M. Hirose, T. Namihisa and E. Kominami 63–69

Phosphorylation of yeast hexokinases
A. B. Vojtek and D. G. Fraenkel 371–375

Regulation of glucokinase by a fructose-1-phosphate-sensitive protein in pancreatic islets
W. J. Malaisse, F. Malaisse-Lagae, D. R. Davies, A. Vandercammen and E. Van Schaftingen 539–545

Analysis of the regulatory region of the *Escherichia coli nupG* gene, encoding a nucleoside-transport protein
A. Munch-Petersen and N. Jensen 547–551

Signal transduction and molecular neurobiology

β-Galactosidase decreases the binding affinity of the insulin-like-growth-factor-II/mannose-6-phosphate receptor for insulin-like-growth-factor II
W. Kiess, C. L. Thomas, M. M. Sklar and S. P. Nissley 71–77

Activation of platelets induced by mAb P256 specific for glycoprotein IIb-IIIa — Possible evidence for a role for IIb-IIIa in membrane signal transduction
C. Bachelot, F. Rendu, C. Boucheix, N. Hogg and S. Levy-Toledano 177–183

Use of the biotin-avidin system for labelling, isolation and characterization of neural cell-surface proteins
Y. von Boxberg, R. Wütz and U. Schwarz 249–256

Molecular cell biology

Studies on the structure and regulation of the human hepatic interleukin-6 receptor
S. Rose-John, H. Schooltink, D. Lenz, E. Hipp, G. Dufhues, H. Schmitz, X. Schiel, T. Hirano, T. Kishimoto and P. C. Heinrich 79–83

Biosynthesis and processing of delta sleep-inducing peptide-like precursors in primary cultures of mouse anterior pituitary cells
A. Bjartell, R. Ekman and Y. P. Loh 131–137

Renin is sorted to the regulated secretory pathway in transfected PC12 cells by a mechanism which does not require expression of the pro-peptide
M. A. J. Chidgey and T. M. Harrison 139–144

Differential biogenesis of photosystem-II in mesophyll and bundle-sheath cells of 'malic' enzyme $NADP^+$-type C_4 plants — A comparative protein and RNA analysis
A. Oswald, M. Streubel, U. Ljungberg, J. Hermans, K. Eskins and P. Westhoff 185–194

Subcellular distribution of acetylcholinesterase forms in chromaffin cells — Do chromaffin granules contain a specific secretory acetylcholinesterase?
S. Bon, M.-F. Bader, D. Aunis, J. Massoulié and J.-P. Henry 221–232

Coupling of insulin-responsive glucose transport to receptors for insulin-like growth factor 1 in primary human fibroblasts
J. A. Maassen and G. C. M. van der Zon 553–557

Developmental biochemistry and immunology

Immunosuppressive activity of bovine seminal RNase on T-cell proliferation
M. Tamburrini, G. Scala, C. Verde, M. R. Ruocco, A. Parente, S. Venuta and G. D'Alessio 145–148

Modulation of gelsolin content in rat aortic smooth muscle cells during development, experimental intimal thickening and culture — An immunohistochemical and biochemical study
C. Chaponnier, O. Kocher and G. Gabbiani 559–565

Osmotic stress and abscisic acid induce expression of the wheat Em genes
P. C. Morris, A. Kumar, D. J. Bowles and A. C. Cuming 625–630
